## **SPALDING COUNTY PUBLIC WORKS TO APPLY HA5 A PRESERVATION PRODUCT TO COUNTY ROADWAYS**

Spalding County Public Works announced that they will be applying HA5, a high-density mineral bond that protects the road from degradation by UV rays and rain for 5-7 years, to two roads in Spalding county as a cost-effective effort to maintain roads rather than wait for them to fail before fixing.

Currently, Blount Construction is scheduled to apply the preservation product to the N. McDonough Road and Vaughn Road on Tuesday, October 30<sup>th</sup>:

The addresses that will be affected are:

1515 N. McDonough Rd.	977 Vaughn Rd
1513 N. McDonough Rd.	811 Vaughn Rd.
1511 N. McDonough Rd.	711 Vaughn Rd.
1509 N. McDonough Rd.	533 Vaughn Rd.
1507 N. McDonough Rd.	369 Vaughn Rd.
1465 N. McDonough Rd.	365 Vaughn Rd.
1405 N. McDonough Rd.	315 Vaughn Rd.
1347 N. McDonough Rd.	

This schedule is subject to change due to weather or other delays. Notices will be delivered to the affected residents 10 days prior to work beginning. Road signs will also be posted 7 days prior to the work beginning. This product takes approximately 8 hours to cure; therefore, travel on these roads will be restricted.

**Note for residents from Blount Construction:** Roads will be closed during application of HA5 beginning at 8:00 AM until the product has cured at 6:00 PM. Residents are asked to move their cars out of these areas before 7:30 AM. Golf carts will be provided to bring people to and from their houses and nearby cars while the road is closed. Do not park cars on the road or have anything else on the road on the day of application. Water will damage the product until it has cured, so please turn off your sprinklers the night before the application in your area.

The contractor is working with the mail service, but there may be a day delay when the product is applied.

Although the application of this project will cause an inconvenience, the long-term benefits are well worth it.

***Should you have any questions or concerns, contact Spalding County  
Public Works at (770)467-4774 or  
Keith Stephens with Blount Construction at 404/358-5894.***
