SPALDING COUNTY CONTRACTS WITH NORESKO TO CONDUCT ENERGY AUDIT

Spalding County has entered into an energy services agreement with NORESKO to identify energy cost savings and conservation measures. The goal of this project is to identify inefficiencies within the system and to monetize inefficiencies to make capital improvements at the Law Enforcement Center.

The Spalding County Board of Commissioners unanimously approved this contract at their Regular Meeting on June 3, 2019 and authorized NORESKO, a leading national energy services company to perform energy conservation services and installations at buildings owned by Spalding County.

This agreement calls for NORESKO to analyze a number county facilities to determine and design potential energy conservation measures. Spalding County officials will then have the opportunity to proceed with implementation of the proposed design. Energy and water consumption savings from the improvements are expected and it is hoped that the anticipated savings from these efforts will pay for the replacement of the Law Enforcement Center roof and potentially other building system and facility upgrades.

William Wilson, County Manager stated: "The contract with NORESKO is moving in a positive direction to not only access and make our current buildings more energy efficient. Then utilizing the savings on energy bills to fund improvements to county buildings."

The scope and value of this project will be specified as the audit work continues.
