SPALDING COUNTY RESIDENTS: WINTER STORM UPDATE

As the threat of another winter storm is upon us we cannot emphasized enough that every resident use their best judgment in travelling during this time. The main rule of thumb is if there is a question about the roadways and you can stay home, **please stay at home!** You can monitor the Atlanta news stations, weather radios and other media sources to gather important details to assist with determining the danger that could be associated in getting out on the road.

The county is putting salt and sand on major roadways, but there is still a strong possibility that ice will be a hazard. Our public works crews as well as emergency personnel will be on hand to manage ice on the streets, but we encourage you to stay at home. In addition, the Governor's Office of Highway Safety has designated Highway 16 as an alternate route for all commercial trucks, so we anticipate additional commercial traffic on this road.

In case of emergency call 911.

If you need emergency assistance, we will respond.
